

The diagram illustrates a spatial arrangement of blue blocks on a grid. A light gray vertical band occupies the left portion of the image. To its right, a white area is defined by a grid of small squares. Several blue rectangular blocks are positioned as follows:

- A horizontal block at the top left of the white area.
- A horizontal block below it, shifted to the right.
- A longer horizontal block below that, shifted further right.
- A small horizontal block on the far left, partially overlapping the gray band.
- A horizontal block in the middle right section.
- A horizontal block below that, shifted to the right.
- A large horizontal block at the bottom right, consisting of several connected segments.
